EDUCATION

Binghamton University, State University of New York, Thomas J. Watson College of Engineering and Applied Science

Master of Science in Computer Science

Expected May 2026

Cumulative GPA: 3.82/4.00

Relevant Coursework: Distributed Systems, Programming Languages, Systems Programming

Birla Institute of Technology And Science, WILP

Master of Technology in Software Systems (IOT Specialization)

December 2023

Relevant Coursework: Cyber Security, Computer Networks, Embedded System Design

Xavier Institute of Engineering, Mahim, Mumbai

Bachelor of Engineering in Electronics and Telecommunications

May 2019

TECHNICAL SKILLS

Languages: C, C++, React, Python, JavaScript, HTML, CSS, PostgreSQL, TypeScript, Java, Angular, Node.js

Software: Git, GitHub, Linux, Unix, Visual Studio Code, Jupyter Notebook, Vim

Additional: Microsoft AWS, Azure, Flask, LangChain, Apache Kafka, FastAPI, XGBoost, Google Gemini 2.5 Flash, GCP Cloud Run

PROFESSIONAL EXPERIENCE

Uplifty AI, iOS/Android Application Development Intern

September 2025 - December 2025

- Built iOS and Android features in React and TypeScript that brought Uplifty's community platform to mobile users
- Integrated Node.js RESTful APIs enabling real-time user connections across the platform
- Participated in agile sprint planning and code reviews to ensure high-quality, production-ready deliverables

TechMahindra, Software Engineer | Mumbai, India

August 2019 - June 2024

- Led full-stack redesign of AT&T's enterprise application using Node.js (backend), HTML5/CSS/JavaScript (frontend), and Java microservices, improving scalability and maintainability across a large user base
- Architected and integrated RESTful APIs and data pipelines on Azure Cloud (Linux environments), delivering real-time performance metrics and reducing issue resolution times
- Drove a 40% increase in user engagement and 25% reduction in support requests by tracking KPIs
- Improved system reliability by 50% through debugging, optimization, and establishing testing workflows in agile sprint cycles
- Collaborated with designers, engineers, and product managers to deliver production-ready features on accelerated timelines

PROJECT EXPERIENCE

ARIA Autonomous Risk and Intelligent Agent, ssb1506.github.io/ARIA/

November 2025 – January 2026

Technologies: XGBoost, Gemini 2.5 Flash, FastAPI, React, Docker, GCP Cloud Run, Python

- Built an agentic AI risk analyst that accepts plain English input, autonomously routes to domain-specific XGBoost models, and delivers real-time risk scores with Gemini-powered natural language explanations across healthcare, fintech, and SaaS domains
- Achieved AUC-ROC of 0.99 (fraud detection) and 0.94 (churn prediction) on 284K and 100K row datasets
- Designed SHAP-based explainability surfacing the top 3 risk drivers per prediction. Deployed end-to-end on GCP Cloud Run (backend) and GitHub Pages (frontend), containerized with Docker, serving live predictions to real users

FeedPulse AI Real-Time Social Media Analytics Platform

October 2025 – November 2025

Tech Stack: Tailwind CSS, PyIceberg

- Full-stack real-time dashboard that streams social media posts via Kafka, visualizes live sentiment trends in React, and provides an AI chat assistant for conversational analytics
- Deployed via CI/CD pipeline (GitHub Actions) to GCP Cloud Run with Upstash Kafka, nginx-served React frontend, and Docker Compose for local development, zero-cost cloud infrastructure.
